

Smart Dry

The Smart Dry is the most efficient desiccant dehumidifier available. The Smart Dry strikes the perfect humidity balance to maintain a quality playing surface.

Smart Dry reduces the ambient load added to the refrigeration system by continually monitoring and maintaining the environment in the arena at the optimal condition.

It also sends maintenance and operating data to staff so they can know what is going on without risk.

Model	CFM	Dimensions “L” “W” “H”	Weight	Nominal Lb. Moisture Removal Per Hour (60 F @ 40% R.H.)
WP-1000	1000	44.98/28.82/33.21	441 Lbs	11.5 Lbs/Hr
WP-2000	2000	47.91/35.71/39.21	496 Lbs	20.5 Lbs/Hr
WP-4000	4000	54.92/44.09/50	838 Lbs	45.5 Lbs/Hr

- Integrated Smart Rink Connect technology
- Electric Desiccant that fits on existing dehumidifier platform
- Removes 3 times moisture as 7.5 TR mechanical dehumidifier

Smart Dry

Smart Features	
Humidity Point	<p>Moisture removal notification</p> <p>Dew point control allows for one set point to maximize moisture remove</p>
Maintenance	<p>Filter change notification</p> <p>Minimal maintenance requirements</p>
Green Reporting	<p>No refrigerant required</p> <p>Provide reporting for internal energy audits</p>
Efficiency Reporting	<p>Eliminate excessive run hours with dew point control</p> <p>Early warning malfunction alarms</p> <p>System health monitoring</p>
Easy to use interface	<p>Remote access through the internet</p> <p>Remote alarming and monitoring capabilities</p> <p>Easy set-up, intuitive, and no training required</p>
